

DANELEC VOYAGE DATA RECORDER

Capture every critical moment

Choose a VDR that surpasses mandatory requirements by ensuring uninterrupted data collection and enabling remote management of the equipment onboard.

Unmatched Performance and Reliability

Uninterrupted data collection and remote management for enhanced maritime safety.

Danelec's Safety solutions surpass the mandatory requirements with larger storage capacities and optimized infrastructure. Our technology leading VDR platform enables smooth retrofit and quicker shipboard services, minimizing downtime. Take full advantage of your onboard data collection system and explore the potential for proactive use of safety and navigational data, securing robust safety management and optimizing operational efficiency.

Unique Value

- **User-Friendly Interface:** Easy to install, configure, and operate, ensuring seamless integration into your vessel's systems.
- **Comprehensive Support:** In stock and available, with a global network of 200 partners and 700 certified technicians providing 24/7 service wherever your vessels are.
- **Future-Proof Solution:** Product life support guaranteed until 2036, with a 3-year warranty and immediate global support.
- **Proven Reliability:** With over 20% market share, Danelec VDRs are trusted by ship operators worldwide.
- **Regulatory Compliance:** Exceeds IMO and SOLAS requirements, certified as IACS UR E27 & IEC 61162-460 Ed. 3.0.

Key Capabilities

- **Real-Time Monitoring:** Provides real-time access to critical voyage data, enabling proactive decision-making and enhancing fleet safety management.
- **Easy Replacement and Upgrades:** Streamline shipboard service with SWAP Technology™ and conversion kits for outdated VDRs.
- **Remote Configuration:** Remote access and configuration capabilities ensure continuous monitoring and immediate response to any issues.
- **Pre-APT Preparation:** Remotely initiated pre-APT provides comprehensive reports and diagnostics, enabling technicians to prepare thoroughly before a ship visit and significantly reducing the chance of needing a follow-up visit.
- **Synchronous Video Playback with VDR Data:** Seamless integration of VDR data and IP video recordings facilitates detailed incident analysis and aiding in investigations.

Certified Excellence

- IMO Type Approval Certificate
- DNV-GL Type Approval Certificate
- ABS Type Approval Certificate
- Lloyd's Register Type Approval Certificate
- Bureau Veritas Type Approval Certificate

Pioneering Maritime Innovation

Empowering maritime operations with trusted, innovative solutions. Our mission is to enhance your fleet's safety, efficiency, and compliance through state-of-the-art technology and unparalleled expertise.
